

Abetter Forensic Solution

Your highly efficient forensic case management

From crime scene to the court

One software for your workflow

With Abetter Forensic Solution you can efficiently manage all case related data in a single forensic case management system. Special benefit: Expand the basic software with expert modules and offer your departments specific functions:

- > DNA analytics
- > Dactyloscopy
- > Shoe print & tire track analysis
- > Toxicology & narcotics
- > Material classification incl. search function for crime evidence

Benefit from efficiency and quality

Optimize your daily work

Simplify your workflow and save precious time with Abetter Forensic Solution. All case related data are managed digitally. Benefit from standardized interfaces to other case management systems and also from useful filter options to find information within seconds. Use your own templates for reports in e.g. Word, Excel, PowerPoint, PDF or HTML.

Cross-department cooperation

Simplify your communication on crime cases, materials, persons and traces by making case information available to all departments. Configure additional custom fields for your departments without programming skills.

Forensic know-how

Our expert team has developed the software with leading criminal investigated services and our international customers. We are a team of scientists and computer experts with more than 10 years of experience in forensics. We offer consulting, technical support, software trainings and installation services.

Quality and reliability

Data security, documentation and seamless audit trails are essential for your work with crime materials. You can rely on Abetter Forensic Solution: The software supports you with the ISO 17025. It is used successfully in accredited bureaus of investigation and criminal investigation laboratories.

Abetter Forensic Solution is as flexible as your needs.

Abetter Case Management

All data of the case life cycle is stored, tracked and processed in Abetter Case Management: Starting from registration of criminal offenses and administering materials to completing tasks. Combine Abetter Case Management with additional modules, to create your own custom solution.

Abetter LIMS DNA

Your solution for forensic DNA laboratories. Optimize your workflow with integrated expert tools for the evaluation of DNA fragment analysis raw data and DNA profile data, comparison of DNA profiles between samples, forensic calculations (ID, RMNE, LR) and kinship calculations. Be on the safe side with automatic DNA contamination checks throughout your entire workflow.

Abetter Dactyloscopy

Process and analyze fingerprints with the interactive trace comparison module for fingerprint identification. Import NIST files from the AFIS database and document your AFIS search results.

Abetter Item Keyword Management

Classify and tag your materials or evidence. Use the search function to find similar materials or evidence and discover new investigation leads through similar cases.

Abetter LIMS TOX

Use the generic LIMS as a platform for your custom laboratory process. Compare products to identify counterfeit characteristics. Maintain the overview of the thresholds and their criminality of narcotics and other substances with the chemical compound database.

Abetter Impression Evidence

Process and manage shoe prints, tire prints and glove marks. Create a database of prints with characteristic patterns to identify prints and marks in crime cases.

Abetter Data Access

Create complex SQL queries for statistics. The integrated active help makes annual statistics a breeze. All data from all modules of the Abetter Forensic Solution can be used for statistics.
